

CONSTRUCTION NOTIFICATION

Hunts Point Lane Culvert Replacement Project

The Town of Hunts Point is beginning construction of the Hunts Point Lane Culvert Replacement Project, which will impact vehicle and pedestrian traffic along Hunts Point Lane.

Project Description: The Town will be replacing the deteriorating corrugated metal culvert under Hunts Point Lane with a new concrete box culvert. This project will also include critical roadway restoration work and improvements to the upstream and downstream riparian corridor. When completed, the new culvert will greatly reduce the need for costly ongoing maintenance of the culvert, improve stream function and fish passage, enhance water quality, and ensure the future integrity of Hunts Point Lane for residents.

What to Expect During Construction: During the project, traffic will be diverted into a single lane. Please expect some minor delays. The work will be occasionally noisy with backhoes moving dirt, cranes moving pieces of the culvert into place, and then trucks rebuilding the road. Hours of work will typically be between 7:30 AM and 4:30 PM, Monday through Friday. No work on weekends is anticipated.

Culvert Installation Timeline:

Early June 2024 – Crews and equipment begin to arrive onsite

End of October 2024 - Project is complete
